

Mingjv Li

limingjv2007@outlook.com +86 166-0481-5982 Beijing, Chaoyang, China
GitHub: taoanfang.github.io

Research Interests

Large Language Models (fine-tuning, prompt engineering) • Natural Language Processing • Multimodal Learning (early-stage exploration) • Computer Vision (image classification, object detection)

Education

Communication University of China

Bachelor of Engineering in Computer Science and Technology

GPA: 3.66/4.0 (Top 5%)

Sep 2025 – Present

Average Score: 91/100

Technical Skills

Programming: Python, C, Java

Libraries/Tools: PyTorch, NumPy, Pandas, Git

Projects

LLM API Application & Prompt Engineering

- Used LLM APIs for text generation and classification tasks.
- Designed and evaluated prompt strategies; compared output quality across variations.
- Developed practical understanding of LLM behavior and response optimization.

CNN Image Classification

- Reproduced a CNN model for image classification using PyTorch.
- Implemented forward pass, loss computation, optimization, and training pipeline.
- Analyzed training dynamics and model performance.

Leadership Experience

Minister, Practice Department

School of Computer Science

- Organized student activities and coordinated departmental operations.
- Led recruitment and onboarding of new members.
- Collaborated with external organizations on practical projects.

Additional Information

- Fast learner with strong coding discipline.
- Strong interest in AI research and academic development.
- Available for remote research (Summer 2026).
